

# 2011 Restoration Activities for Churchill Park

## Main goals

- Churchill Park Public Work Days
- Maintain front prairie and wetland areas
- Treat all patches of reed canary grass
- Improve the upper prairie and reseed with native grass mix
- Decrease mowing in turf areas around recently demolished house
- Remove buckthorn along old fence-lines
- Remove the fence that bisects the property
- Plant native plugs in the central wetland area
- Expand the school prairie area
- Replant the two beds near the school
- Plant a native grass seed mix near school site
- Monitor storm-water flow rates and floodwater depths
- Girdle large buckthorn trees in orchard
- Remove large female buckthorn trees along central-western property line
- Plant native shrubs where needed as funds and volunteers allow
